MEMORANDUM FOR: Chief, Resources Division, ORR

25X1A ATTENTION : [REDACTED] R/FU  
THROUGH : Chief, Requirements Branch, Reconnaissance Group, CGS  
FROM : Chief, CIA/PID (NPIC)  
SUBJECT : Salavat Petroleum Refinery, USSR  
REFERENCES : (1) ORR Requirement No. ORR/312/62  
(2) CIA/PID Project No. C 1126/62

1. This memorandum is in response to the referenced requirement which asks for a detailed photo analysis of the Salavat Petroleum Refinery, USSR.

2. Analysis of the best available photography covering the area of the petroleum refinery indicates that there are both distillation and cracking units present. There is a treating and blending section (with warehousing, canning and shop facilities) within the complex. There are also approximately 200 storage tanks ranging from small to large and 38 open pit reservoirs for crude storage. Construction material and new bases for storage tanks were observed just west of the refinery. The heat and power plant is on the southern portion of the refinery and appears to be in operation. Atmospheric emissions can be observed from various units of the complex and from these observations would indicate that the refinery is in operation. The installation is both road and rail served.

3. In an area search around the refinery, a possible petrochemical complex was observed approximately 1 1/4 nm due east, and is so annotated on the enclosed enlargements.

4. This study was conducted from KEYHOLE Mission [REDACTED] 25X1D  
25X1D [REDACTED] which is the best available photography covering the area.  
For comparative photo coverage of the refinery, a photo enlargement from  
25X1D KEYHOLE Mission [REDACTED] dated [REDACTED] has also been utilized. 25X1D
